PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building production-grade, responsive web applications with React.js, Next.js, and TypeScript. Strong in component-based architecture, state management (Redux, Zustand, Recoil, React Query), and RESTful/GraphQL API integration for data-driven interfaces. Experienced in building reusable component libraries, optimizing performance (Lighthouse, code-splitting, lazy loading), and shipping WCAG 2.1-accessible, cross-browser-compatible UI. Comfortable owning a feature end-to-end from requirements through deployment in fast-paced, in-office product teams.

TECHNICAL SKILLS

Core: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling & UI: Tailwind CSS, Bootstrap, Material UI, SASS/SCSS, Styled Components, Responsive & Cross-Browser Design

State Management: Redux, Zustand, Recoil, Context API, React Query

APIs: RESTful APIs, GraphQL, Apollo Client, Axios, Postman

Performance: Code Splitting, Lazy Loading, Bundle Optimization, Lighthouse, Web Vitals, PWA

Accessibility: WCAG 2.1, ARIA Attributes, Keyboard Navigation, Screen Reader Testing

Testing & Quality: Jest, Cypress, Playwright, ESLint, Prettier

Tooling: Git, GitHub, Bitbucket, Vercel, CI/CD (GitHub Actions, CircleCI), Webpack, Vite, Figma

Also: WordPress, jQuery, PHP, MySQL, SEO, Google Analytics

WORK EXPERIENCE

Senior Frontend Developer & IT Support

Nov 2025 – July 2026

DotXpertise, Mysore • HTML5 CSS3 JavaScript Responsive Design React.js, Next.js, REST API, Git, Vercel

- Architect and build responsive, component-based web applications with React.js and Next.js, following scalable design patterns used for production dashboards and client-facing portals.
- Mentored and coordinated a **frontend team of two developers and one intern**, conducting code reviews, task planning, and technical guidance to ensure high-quality deliveries.
- Build and maintain a reusable UI component library, cutting development effort by 30% across parallel projects.
- Integrate RESTful APIs and third-party services for seamless, real-time data synchronization across the UI.
- Lead performance optimization (lazy loading, code splitting, image compression), lifting Lighthouse scores by 25%+.
- Own end-to-end deployments via Git/GitHub and Vercel with zero-downtime releases; enforce code quality through reviews, OWASP practices, and WCAG 2.1 accessibility standards.
- Collaborate cross-functionally with design and backend teams in Agile sprints; also provide IT support (hardware/network troubleshooting) for the wider team.
- Independently designed, built, and deployed 6 production websites end-to-end, owning the full feature lifecycle from requirements to launch.
- Implemented pixel-perfect, fully responsive layouts with HTML5, CSS3, JavaScript, and React.js, matched to client brand guidelines.
- Applied performance practices (asset optimization, efficient CSS architecture, lazy loading), reducing load times by 35%.
- Managed deployment workflows end-to-end (domain configuration, hosting, post-launch monitoring) and worked directly with clients on requirements, achieving 100% satisfaction.

Web Designer / Frontend Developer

Oct 2024 – Nov 2025

DotXpertise, Mysore • WordPress, HTML5, CSS3, JavaScript, jQuery, Figma, Git

- Delivered 15+ responsive, SEO-optimized websites, driving a 30% average increase in organic client traffic.
- Improved UI/UX consistency, lifting user satisfaction scores by 25% and cutting bounce rates by 18%.
- Streamlined design-to-development handoffs using Figma, cutting iteration cycles by 30%; integrated backend APIs for consistent cross-device experiences.
- Ensured WCAG 2.1-compliant designs and managed error-free deployments via Git and Vercel.

KEY PROJECTS

React.js, TypeScript, Tailwind CSS, REST API, Git, Vercel

- Built a high-performance, responsive e-commerce frontend with React.js and TypeScript; improved page rendering speed by 30% using lazy loading and code splitting.
- Designed a scalable component architecture with centralized state management for product filtering, cart, and checkout flows the same patterns used in data-heavy dashboard UIs.
- Drove a 22% higher conversion rate through usability testing and iterative navigation improvements; enhanced SEO and WCAG accessibility.

Certification Generation System

Sep 2024 – Oct 2024

PHP, MySQL, HTML5, CSS3, JavaScript

- Built a dual-interface web application with role-based access (Student / Teacher) a portal-style architecture similar to client/internal dashboards automating certificate generation end-to-end.
- Improved issuance efficiency by 70% with integrated PDF generation and download, and cut manual errors by 40%.
- Optimized SQL queries and backend logic, cutting data retrieval latency by 35%.

EDUCATION

Bachelor of Computer Applications (BCA)

Jun 2020 – Jun 2023

SBRR Mahajana First Grade College, Mysore

CERTIFICATIONS

- Full Stack Java Developer Certification — Besant Technologies
